Summary

Backend and AI Engineer pursuing an MCA at SRM Institute of Science and Technology (CGPA 9.08/10), with 3 software development internships building FastAPI and Node.js backends, LangGraph multi-agent LLM systems, and full-stack Next.js applications. Built and deployed 2 live AI products (InterviewAI, OfferSafe) using Groq, Gemini, and Supabase. Seeking Backend, AI/ML, or Full Stack Software Engineer roles.

Technical Skills

Languages: Python, TypeScript, JavaScript, SQL, HTML5, CSS3
AI / GenAI: LangGraph, LangChain, RAG, LLM APIs (Groq, Gemini, OpenAI), Prompt Engineering, Semantic Search, Vector Embeddings, NLP
Data & ML Libraries: Scikit-learn, Pandas, NumPy, NLTK
Backend: FastAPI, Node.js, Express.js, SQLAlchemy, Pydantic, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Swagger/OpenAPI
Frontend: React.js, Next.js, Tailwind CSS, Streamlit
Databases: PostgreSQL, pgvector, MongoDB, MySQL, SQLite, Supabase
DevOps & Testing: Docker, GitHub Actions (CI/CD), Git, Pytest, Playwright, Vercel

Experience

8 Queens Software Private Limited **Aug 2026 – Sep 2026**
Software Developer Intern Chennai, India (On-site)

- Engineered GRID07, a multi-agent AI platform using LangGraph, FastAPI, and Next.js that routes user queries to expert personas and executes them across 6 LLM provider integrations, including Groq, Gemini, OpenAI, and OpenRouter.
- Built a semantic persona router (384-dim feature-hashed embeddings, NumPy cosine similarity, domain and topic signals) with 84% held-out accuracy at 1 ms per route.
- Implemented layered security: prompt-injection defense (regex heuristics, delimiter quarantine, system-level persona locking), a Fernet-encrypted API key vault, and SSRF protection.
- Built async REST APIs (FastAPI, SQLAlchemy 2.0, Pydantic v2, JWT) on PostgreSQL/pgvector and SQLite, covered by 84 Pytest tests and a routing benchmark in CI.

B2World **Jul 2026 – Aug 2026**
Software Developer Intern Remote

- Developed features for DriveLearn India, a full-stack SaaS platform that digitizes driving school operations and provides a marketplace for learners to discover, compare, and enroll in driving schools.
- Implemented web application features across role-based access, driving school management, student and instructor workflows, course management, booking and scheduling, and analytics.
- Followed a modular RESTful API architecture on a React.js, Node.js, PostgreSQL/MySQL, and JWT stack.

IT Developer **Aug 2024 – Oct 2024**
MERN Full Stack Web Developer Intern Rourkela, Odisha

- Developed a Result Management System on the MERN stack (MongoDB, Express.js, React.js, Node.js).
- Delivered frontend and backend modules, REST APIs, and MongoDB database integration for the application.

Projects

InterviewAI | Next.js, React.js, Groq API (Llama 3.3 70B), Supabase Live Demo | GitHub

- Built and deployed a full-stack AI mock interview platform with Technical, HR, and Case Study modes, accepting answers via text, voice, or webcam video.
- Scored answers on 4 dimensions (accuracy, clarity, depth, confidence) with AI feedback, saved session history with progress charts, and added 2-person peer interview rooms with an observer mode.

OfferSafe | Next.js, TypeScript, Supabase, Gemini API, Groq API, Tailwind CSS Live Demo | GitHub

- Built and deployed an AI scam risk analyzer that scores job and internship offers for Indian job seekers.
- Scored 19 weighted risk signals (email and domain checks, CIN validation, payment red flags, Reddit mentions) plus a Gemini/Groq review, checked against a community scam database; rate-limited APIs.

Finance Dashboard Backend | Python, FastAPI, SQLAlchemy, PostgreSQL, Docker, JWT GitHub

- Built a RESTful backend API with JWT authentication, bcrypt password hashing, and role-based access control for viewer, analyst, and admin roles.
- Implemented CRUD, soft deletes, pagination, filtering, and dashboard analytics; 34 Pytest tests at 99% coverage run in GitHub Actions CI.

WhatsApp Chat Analysis | Python, Streamlit, Pandas, Scikit-learn, NLTK GitHub

- Built an 8-tab dashboard with EDA, activity heatmaps, VADER sentiment analysis, and LDA topic modelling; parses Android and iPhone chat exports, covered by 16 Pytest tests.
- Trained a TF-IDF spam classifier (Naive Bayes, Logistic Regression) and a Random Forest user predictor.

Education

Master of Computer Applications (MCA) **2025 – 2027**
SRM Institute of Science and Technology, Chennai CGPA: 9.08/10

Bachelor of Computer Applications (BCA)
Arka Jain University, Jharkhand CGPA: 7.54/10

Class XII (NIOS), D.B.M.S Career Academy, Jamshedpur 76%

Class X (CBSE), Central Public School, Adityapur 96%

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Operating Systems, Computer Networks, Artificial Intelligence, Machine Learning

Certifications

- **IBM Machine Learning Professional Certificate** – IBM / Coursera, Nov 2024
- **Software Engineering Specialization** – HKUST / Coursera, Mar 2025
